## ASSESS AND RESTORE

The Assess and Restore approach to care represents a fundamental shift in the way we approach health care delivery for Ontario's older adults. This shift includes an increased focus on the prevention of functional decline and avoidable hospitalization through proactive risk screening and improved access to geriatric assessment and restorative services.

For more information visit  
[swassessandrestore.ca](http://swassessandrestore.ca)

## ASSESSMENT URGENCY ALGORITHM

The Assessment Urgency Algorithm (AUA) Screener supports the identification of high risk older adults in the community. This tool was developed by interRAI™ and is available as a smart phone application.

Get the app at  
<http://apple.co/2bgZAFf>

Using [swassessandrestore.ca](http://swassessandrestore.ca) allows care providers to quickly identify services to help community-dwelling older adults maintain independence.
